Hello,

I've been using leveraged ETFs (TQQQ and MVV) as a key element of my financial planning success for many years. I know what I'm doing. I fully understand the positives and risks that come with leveraged funds.

These funds are extremely important to me. If you take leveraged ETFs away, you're taking away a clear path for me, and many others, to financial independence.

When these ETFs are used in the correct manner, by using a systematic approach, they improve my performance over the long term. I am not using these funds in a reckless manner.

I do not want oversight by a third party telling me how I can and cannot invest my money. I take ownership of my actions. Please do not restrict my financial plan based on others that do not take ownership of their actions.

Please keep leveraged funds available to all investors.

Thank you,
Ben
