This is for my comment I'm in favor of the supportive Capital formation of assets I have a suggestion I have one asset the kid pay off the national debt and then some I'm willing to donate that and in return I would ask if possible did any pending cases that I may have get expunged and the transfer of my data I've tried to do it a few times I'm in favor of that so everybody can benefit from that in return I would like to have immediate available funds into a financial institution and have access to real estate I need a house and I need some money I'm willing to work with you and the nation God bless America
