I have been running my own quarterly plan that is powered by leveraged ETF, I do my research and I am confident in redirecting my hard earned funds as I feel fit.. The leveraged products are the key part of my financial plan.

I have been doing this for some years now, my overall performance has been very good to me over the long term,
I understand the risks and I do not want to be dictated on how to invest my monies, I am not reckless,
I do my research of daily magnification of an index's price movement, and I use this magnification to my advantage.

I do not want a third party questioning my ability to manage these funds, and I do not need to be told when and how to buy.

Are leveraged funds restricted to only the wealthy, elimination of the middle class is a very strong directive to be heading.

Please keep leveraged funds available to all investors.

Regards
Roberta Dörner
